Alireza Shabani

Software Engineer

also known as **Revisto**

Software Engineer skilled in **Python**, **Django**, **Flask**, and **PHP**, with a passion for building user-friendly and impactful web applications. Proven problem-solver and team player with a strong drive to learn.

Feel free to check out my GitHub profile to see a selection of personal projects and open-source contributions: **github.com/Revisto**

Education

Bachelor Of Computer Science   2023 - NOW

Azad University, Science And Research Branch

Work Experience

Software Engineer (Contract)
Kanoon Amoozesh Ghalamchi (2024)

Developed and implemented a **fine-tuned AI model** for classifying pre-school assessment questions, improving accuracy and efficiency of child skill evaluations. Used **ChatGPT**, **fine-tuning techniques**, and **Python**.

Software Engineer (Remote)
Alter Learning - Educational Platform (2023)

Led the **migration** of a WordPress-based educational platform to a robust **Django** architecture, enhancing performance. Designed a scalable database structure and adopted **Test-Driven Development (TDD)** for code quality.

Software Engineer (Remote)
WikiSuite (Open Source Project) (2021)

Contributed to the development of a **web-based PHP email client**, focusing on email integration, **bug fixes**, and **UI/UX improvements**. Diagnosed and resolved email integration issues, enhancing system stability.

Co-Founder (startup)
Urge (Motivational Content Platform) (2020)

Co-founded a startup delivering motivational content through a web platform built using **Python Flask**. Architected and developed the platform's backend, ensuring scalability and efficiency.

Graphic Designer (startup)
HiType (Online Typing Platform) (2018)

Led the **visual design** for an online platform teaching 10-finger typing, creating all **graphical elements** and ensuring a cohesive user experience. Designed and illustrated characters and **animated GIFs**.
